## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Aho'196.

The Aho'196 teaches that it is known in the art to make and use composition comprising the claimed elements to coat a paper. See abstract, column 3, lines 1-40.

The applied reference does not specifically teach imide component or the claimed ranges of the components in the composition.

However, it would have been obvious to one having ordinary skill in the art at the time of the invention to optimize the amounts of the components in the composition as well as include well known imides in such composition since such would improve barrier and processing properties of the composition.
